

Create Train And Test Folders

Step1: Create Train and Test folders with each folder having folders with images of different hand signs. A minimum of 100 images needs to be present in each category folder to get the maximum no of features.

PC > New Volume (D:) > SmartBridge > MLAI > ML_Projects > Projects > conversation engine for deaf and dumb > dataset >			
Name	Date modified	Type	Size
 test_set	9/8/2020 10:52 AM	File folder	
 train_set	9/8/2020 9:52 AM	File folder	

Dataset can also be downloaded from the reference provided
